

SUMMER 2010

stylenotes

Create your own summer getaway...

As temperatures heat up, our thoughts turn to all things summer. Relaxing with family and friends on cottage getaways, taking walks on the beach while collecting shells, and rejuvenating our spirits in calm and airy settings – these are quintessential summer memories that we can easily evoke with this season’s hottest décor trends.

Domus Decor offers great ideas to help you create an oasis, from quality Canadian-made furniture to an upholstery fabric collection of summer-inspired colours to decorative finishing touches. Complete the look with oversized footed hurricane glass vases that are ideal vessels for showcasing assorted shells and ocean treasures.

Palma Brava, which literally means ‘great strong palm,’ offers unique and tropic-inspired furnishings. Their signature collection, mostly made up of the finest rattan and wicker, now includes glass, marble, and wrought iron. Textured glass fish or a bamboo tree lamp with delicate glass leaves fit perfectly in your summer home.

Now that you’ve created a tranquil setting on the homefront, this is a good time to create that same sense of inner peace. **Stratusphere’s** yoga team can show you how to increase your energy, strengthen and tone your body, and rejuvenate your spirits.

Visit these great stores, and more, at **The Village at Vaughan Mills** and **Satisfy Your Sense of Style**.
